1. About Your Organisation

NOTE: Except where stated, please relate all answers to the lead organisation. These questions are for information purposes and do not form part of the assessment.

1.1 Name of Organisation

Except where specified, please relate all answers to the lead organisation.

1.2 Organisation Type

Please select from: Primary School; Secondary School; Further Education College/6th Form; University; Local Education Authority; Charity; Other.

Please answer with respect to the lead organisation, even if there are a variety of different types of entities in your partnership.

If your organisation is already entered into our application system, this will be answered automatically.

Charity

1.3 Please give the name and a brief description of any partner organisations that will contribute to this project

1.4 Lead Applicant contact name

1.5 Lead Applicant contact email address

1.6 Lead Applicant contact telephone number

1.7 Lead Applicant contact role/position

1.8 Please describe briefly your main activities, and estimate what proportion of your resources (staff time / funding) are devoted to education.

1.9 How many staff members has your organisation (in Full Time Equivalent) ?

1.10 What is your organisation's annual income (in GBP)?

Please include income from all sources, e.g., charitable grants, government donations etc.
2. About the Project

2.1 Project Title

(max. 25 words)

Please enter a project title in this box. If your project title is yet to be determined, please enter “TBC”.

Simple, descriptive titles (e.g. “Online peer tutoring”) are welcome

TBC

2.3 Please explain how your project fits with our approach

As outlined above, we intend to support projects which will effectively challenge educational disadvantage and improve our knowledge of what works in raising the attainment of disadvantaged students. These approaches should be based in ideas generated by neuroscience research. In this section please outline how your project fits with this approach, including:

- the neuroscientific basis of your proposal
- how the neuroscience refines the educational intervention
- how this could impact on educational outcomes, including raising the attainment of disadvantaged students

2.4 Please cite any previous evidence showing that your proposal is likely to raise attainment

(e.g. pilot results, evidence from other countries, evidence from related schemes, well-evidenced education theory, etc.). Wherever possible, please show evidence that children who participate in the proposed project (or something similar) improve relative to a comparison group of similar children who do not participate.

2.5 Please explain how practical your proposed intervention would be for schools to implement

2.6 If the proposed project has been piloted or is already being implemented, please describe its reach and impact, and the cost so far

We are interested in how established the project is and what its reach and impact has been.

2.7 Please describe the target population of the proposed intervention

Give details of the pupil characteristics, such as age, and the school type, as well as an estimate of how many pupils you expect to be affected directly by the proposed project. Please note, actual delivery may involve different numbers of pupils to those included in this proposal, as determined by the views of the independent evaluators.

2.8 In addition to educational attainment levels, which we would expect to be measured by the
independent evaluators, are there any further outcomes or experimental data which you would like to collect to better understand the impact of the proposed intervention and the process of change?

2.9 Additional comment

If you have any further comments to make regarding your proposal, please explain here.
## Expenses

### 3.1 How much funding are you seeking in total? What proportion of this are you seeking from the joint EEF and Wellcome Trust funding initiative?

Please let us know how much your project will cost and how much of that that you are asking the EEF and Wellcome Trust to fund.

If you have approached, or are considering approaching, any other organisations to seek funding for this project, please outline these organisations and the amounts sought here.

If for-profit companies are involved, please outline the expected subsidy or co-funding that they will contribute.

**NOTE:** You do not need to include independent evaluation costs, but do include costs for any additional outcome or experimental measures which you would be responsible for collecting.

### 3.2 Please give a breakdown of the proposed costs and phasing

We will provide funding for the directly incurred costs of the research project. Directly incurred costs are actual costs that are explicitly identifiable as arising from the conduct of a project (e.g. staff salaries, equipment, materials, travel). These costs are charged as the cash value actually spent and are supported by an auditable record. We do not fund on a proportion of full economic costs (fEC) basis. All equipment, materials and consumables, etc. should be clearly and carefully justified where requested in the form. The outlined costs should offer the very best value for money.

### 3.3 Additional comment on funding (optional)
